

IES Approved Method **IES Guide for  
Determination of Average  
Luminance (Calculated)  
for Indoor Luminaires**

**IES Guide for Determination  
of  
Average Luminance (Calculated) for Indoor Luminaires**

**Publication of this LM  
has been approved by IES.  
Suggestions for revisions  
should be directed to IES.**

**Prepared by the Photometry of  
Indoor Luminaires Subcommittee  
of the IES Testing Procedures Committee**

IES Standards and Guides are developed through committee consensus and produced by the IES Office in New York. Careful attention is given to style and accuracy. If any errors are noted in this document, please forward them to Brian Liebel, Director of Technical Standards, at the above address for verification and correction. The IES welcomes and urges feedback and comments.

#### **DISCLAIMER**

IES publications are developed through the consensus standards development process approved by the American National Standards Institute. This process brings together volunteers representing varied viewpoints and interests to achieve consensus on lighting recommendations. While the IES administers the process and establishes policies and procedures to promote fairness in the development of consensus, it makes no guaranty or warranty as to the accuracy or completeness of any information published herein.

The IES disclaims liability for any injury to persons or property or other damages of any nature whatsoever, whether special, indirect, consequential or compensatory, directly or indirectly resulting from the publication, use of, or reliance on this document.

In issuing and making this document available, the IES is not undertaking to render professional or other services for or on behalf of any person or entity. Nor is the IES undertaking to perform any duty owed by any person or entity to someone else. Anyone using this document should rely on his or her own independent judgment or, as appropriate, seek the advice of a competent professional in determining the exercise of reasonable care in any given circumstances.

The IES has no power, nor does it undertake, to police or enforce compliance with the contents of this document. Nor does the IES list, certify, test or inspect products, designs, or installations for compliance with this document. Any certification or statement of compliance with the requirements of this document shall not be attributable to the IES and is solely the responsibility of the certifier or maker of the statement.

for possible Errata, Addenda, and Clarifications, [www.ies.org/bookstore](http://www.ies.org/bookstore).

## Contents

<b>Introduction</b> .....	<b>1</b>
<b>1.0 Scope</b> .....	<b>1</b>
<b>2.0 Normative References</b> .....	<b>1</b>
<b>3.0 Nomenclature and Definitions</b> .....	<b>1</b>
<b>3.1. AB</b> .....	<b>1</b>
<b>3.2. ABP</b> .....	<b>1</b>
<b>3.3. angle <math>\theta</math> (vertical viewing angle)</b> .....	<b>1</b>
<b>3.4. angle <math>\psi</math> (horizontal viewing angle)</b> .....	<b>1</b>
<b>3.5. AS</b> .....	<b>1</b>
<b>3.6. ASP</b> .....	<b>1</b>
<b>3.7. Average luminance (Calculated)</b> .....	<b>1</b>
<b>3.8. D</b> .....	<b>1</b>
<b>3.9. H</b> .....	<b>2</b>
<b>3.10. L, W</b> .....	<b>2</b>
<b>3.11. Total projected luminous area (at viewing angle <math>\theta</math>)</b> .....	<b>2</b>
<b>4.0 General method of calculation of average luminance (Calculated)</b> .....	<b>2</b>
<b>4.1. Circular Luminaire Openings (Open Bottom or Flat Lens)</b> .....	<b>2</b>
<b>4.2. Circular Luminaire Openings with Drop Lenses</b> .....	<b>2</b>
<b>4.3. Square or Rectangular Luminaire Openings (Open Bottom or Flat Lens)</b> .....	<b>3</b>
<b>4.4. Square or Rectangular Luminaire Openings with Drop Lenses</b> .....	<b>3</b>
<b>4.5. Irregularly Shaped or Polygonal Openings for Luminaires</b> .....	<b>3</b>
<b>4.6. Projected area formula for luminous opening types defined in LM-63</b> .....	<b>5</b>
4.6.1. Point .....	<b>5</b>
4.6.2. Rectangular .....	<b>5</b>
4.6.3. Rectangular with Luminous Sides .....	<b>5</b>
4.6.4. Circular .....	<b>5</b>
4.6.5. Ellipse .....	<b>5</b>
4.6.6. Vertical cylinder .....	<b>5</b>
4.6.7. Sphere .....	<b>5</b>
4.6.8. Horizontal cylinder along photometric horizontal .....	<b>5</b>
4.6.9. Horizontal cylinder perpendicular to photometric horizontal .....	<b>6</b>
4.6.10. Vertical circle facing photometric horizontal .....	<b>6</b>
4.6.11. Vertical ellipse facing photometric horizontal .....	<b>6</b>
<b>4.7. Surfaces with multiple light emitting openings</b> .....	<b>6</b>
<b>Annex A - Representative Area Formulas Reference (not all-inclusive)</b> .....	<b>7</b>
<b>A.1 Circular Luminaire Opening (Open Bottom or Flat Lens)</b> .....	<b>7</b>
<b>A.2 Circular Luminaire Openings with Drop Lenses (Truncated Cone)</b> .....	<b>7</b>
<b>A.3 Square or Rectangular Luminaire Openings (open bottom or flat lens)</b> .....	<b>9</b>
<b>A.4 Square or Rectangular Luminaire Openings with Drop Lenses</b> .....	<b>11</b>
<b>A.5 Spherical Lens</b> .....	<b>11</b>
<b>References (for Annex A)</b> .....	<b>13</b>
