Library of Congress Cataloging-in-Publication Data

Names: Walker, Robert (Hydraulic engineer), author. | American Water Works Association, editor.

Title: M23 PVC pipe : design and installation / by Robert Walker.

Other titles: PVC pipe | PVC pipe--design and installation.

Description: Third edition. | Denver, CO : American Water Works Association, [2020] | Revised edition of: PVC pipe--design and installation. | Includes bibliographical references and index. |

Summary: "This manual provides the user with both general and technical information to aid in design, procurement, installation, and maintenance of PVC pipe and fittings. This manual presents a discussion of recommended practices"-- Provided by publisher.

Identifiers: LCCN 2020000645 | ISBN 9781625763600 (paperback)

Subjects: LCSH: Water-pipes--Design and construction. | Pipe, Plastic. | Polyvinyl chloride.

Classification: LCC TD491 .W28 2020 | DDC 696/.1--dc23

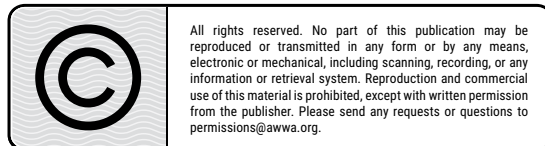

LC record available at <https://lcn.loc.gov/2020000645>

Preface

This is the third edition of AWWA M23, *PVC Pipe—Design and Installation*. This manual provides the user with both general and technical information to aid in design, procurement, installation, and maintenance of PVC pipe and fittings.

This manual presents a discussion of recommended practices. It is not intended to be a technical commentary on AWWA standards that apply to PVC pipe, fittings, and related appurtenances.

This page intentionally blank.

Acknowledgments

The following key individuals and members of the PVC Pipe Design Manual Subcommittee were instrumental in updating this edition of the M23 manual.

Robert Walker, (Task Group Chairman) Underground Solutions, Southlake, Tex.
Linda Bowles, Bureau of Reclamation, Denver, Colo.
Amster Howard, Consultant, Lakewood, Colo.
Tim McCandless, Staff Engineer Liaison, AWWA, Denver, Colo.
Jay Parvez, Uni-Bell PVC Pipe Association, Dallas, Tex.
Larry Schmidt, Diamond Plastics Corporation, Grand Island, Neb.
Suzanne Scott, North American Pipe Corporation, Woodbridge, Ont. Canada
Dennis Shumard, EBAA Iron, Katy, Tex.
Bill Whidden, Woolpert, Orlando, Fla.

This manual was developed by the AWWA Standards Committee on PVC Pressure Pipe and Fittings. The membership of the committee at the time it approved this manual was as follows:

W. R. Whidden, (Committee Chair) Woolpert, Orlando, Fla.
S. D. Adams, Gwinnett County Dept. of Water Resources, Lawrenceville, Ga.
J. R. Barbier, Denver Water, Denver, Colo.
R. R. Bishop, Diamond Plastics Corporation, Grand Island, Neb.
L. M. Bowles, (Chapter Chair) Bureau of Reclamation, Denver, Colo.
J. P. Castronovo, Blue Ridge, Ga.
A. Chastain-Howley, (Standards Council Liaison) Atonix Digital, Frisco, Tex.
A. J. Ciechanowski, NSF International, Ann Arbor, Mich.
S. J. Cook, Black & Veatch, Virginia Beach, Va.
S. E. Cooper, Uni-Bell PVC Pipe Association, Louisville, Ky.
S. Ferry, PSILab Inc., Longmont, Colo.
G. Garcia, JM Eagle, Los Angeles, Calif.
L. J. Gill, (Chapter Chair) Ipex Management Inc., Oakville, Ont. Canada
S.B. Gross, North American Pipe, Wayne, Pa.
G. Gundel, Specified Fittings, Bellingham, Wash.
J. Hebenstreit, UL LLC, Northbrook, Ill.
W. Hitchcock, (Staff Adviser) AWWA, Denver, Colo.
J. F. Houle, John F. Houle LLC, Livingston, Tex.
M. Huynh, JM Manufacturing Company Inc. DBA JM Eagle, Los Angeles, Calif.
K. S. Jeng-Bulloch, City of Houston, Houston, Tex.
A. Korell, City of North Bay, North Bay, Ont. Canada
J. Larson, Marshall Municipal Utilities, Marshall, Minn.
T. E. Layton, Orange County Utilities, Orlando, Fla.
S. C. Macleod, UL LLC, Melville, N.Y.
M. T. Marino, Nussbaumer & Clarke, Inc., Buffalo, N.Y.

- A. Marner, Bureau of Reclamation, Denver, Colo.
- T. Marti, (Chapter Chair) Underground Solutions Inc., Warrendale, Pa.
- T.J. McCandless, (Staff Engineer) AWWA, Denver, Colo.
- S. A. McKelvie, HDR Engineering Inc., Boston, Mass.
- J. R. Paschal, Paschal Engineering, Sandy, Utah
- M. Rennau, Diamond Plastics Corporation, Grand Island, Neb.
- J. Riordan, HARCO Fittings, Lynchburg, Va.
- J. Rudolf, Diamond Plastics Corporation, Grand Island, Neb.
- V. B. Sandoval, Natural Resources Cons. Svc., Boise, Idaho
- L. D. Schmidt, (Chapter Chair) Diamond Plastics Corporation, Grand Island, Neb.
- S. Scott, (Chapter Chair) Royal Building Products, Woodbridge, Ont. Canada

- S. Titus, Washington Suburban Sanitary Commission, Laurel, Md.
- R. P. Walker, (Chapter Chair) Underground Solutions, Southlake, Tex.

Chapter **1**

General Properties of Polyvinyl Chloride Pipe

Polyvinyl chloride (PVC)* was discovered in the late nineteenth century. Scientists at that time found the new plastic material unusual in that it appeared nearly inert to most chemicals. However, it was soon discovered that the material was resistant to change, and it was concluded that the material could not be easily formed or processed into usable applications.

In the 1920s, scientific curiosity again brought PVC to public attention. In Europe and America, extended efforts eventually brought PVC plastics to the modern world. Technology, worldwide and particularly in Germany, slowly evolved for the use of PVC in its unplasticized, rigid form, which today is used in the production of a great many extruded and molded products. In the mid-1930s, German scientists and engineers developed and produced limited quantities of PVC pipe. Some PVC pipe installed at that time continues to provide satisfactory service today. Molecularly oriented polyvinyl chloride (PVCO) pressure pipe has been installed in Europe since the early 1970s and in North America since 1991. Fusible PVC pipe has been installed in North America since 2004.

MATERIAL PROPERTIES OF PVC PIPE COMPOUNDS

Polyvinyl chloride pipe and fabricated fittings derive properties and characteristics from the properties of their raw material components. Essentially, PVC pipe and fabricated

* Unless otherwise noted in this manual, "polyvinyl chloride pipe" or "PVC" refers to PVC bell-and-spigot pipe and PVC fusible pipe; "PVCO" refers to molecularly oriented PVC pipe.
