This publication is not a single source document but a compendium of many sources of ICT industry-related terminology.

The information contained in this publication includes, but is not limited to, national and international codes, de jure and de facto standards, and industry-accepted best practices terminology.

BICSI recommended best practices are industry-established best practices and not specifically developed by BICSI. When necessary, BICSI will select and recommend widely used and acceptable methods for the performance of a particular task or process based on numerous factors, including, but not limited to, widespread field acceptance, manufacturer's recommended methods, and safety.

WARNING

It is the responsibility of the user of *BICSI's Special ICT Design Considerations* publication to determine the use of the applicable safety and health practices (e.g., in the United States, Occupational Safety and Health Administration [OSHA], *National Electrical Code*[®] [*NEC*[®]], *National Electrical Safety Code*[®] [*NESC*[®]]) associated with information and communications technology (ICT) installation and design practices. BICSI shall not be liable to the purchaser or any other entity with respect to any liability, loss, or damage caused directly or indirectly by application or use of this publication. No project is so important nor any completion deadline so critical to justify nonconformance to ICT industry standards. This publication does not address safety issues associated with its use. It is the ICT industry professional's responsibility to use established and appropriate safety and health practices and to determine the applicability of all regulatory issues.

About BICSI ... Advancing Information and Communications Technology

BICSI Vision Statement

BICSI® is the worldwide preeminent source of information, education, and knowledge assessment for the constantly evolving information and communications technology (ICT) industry.

BICSI Mission Statement

BICSI's mission is to:

- Lead the ICT industry with excellence in publications, education, and knowledge assessment.
- Advance our members' ability to deliver the highest quality products and services.
- Provide our members with opportunities for continual improvement and enhanced professional stature.

BICSI 2015 Board of Directors

President: Michael Collins, RCDD, RTPM, CCDA, NCE

President-Elect: Brian Ensign, RCDD, NTS, OSP, RTPM, CSI

Secretary: Robert “Bob” Erickson, RCDD, NTS, OSP, WD, RTPM

Treasurer: Mel Lesperance, RCDD

Canadian Region Director: Peter Levoy, RCDD

U.S. North-Central Region Director: Christy Miller, RCDD, DCDC, RTPM

U.S. Northeast Region Director: Carol Everett Oliver, RCDD, ESS

U.S. South Central Region Director: Jeffrey Beavers, RCDD, OSP

U. S. Southeast Region Director: Charles “Chuck” Wilson, RCDD, NTS, OSP

U.S. Western Region Director: Larry Gillen, RCDD, OSP, ESS, CTS

BICSI Executive Director & Chief Executive Officer: John D. Clark Jr., CAE

Acknowledgments

BICSI's Technical Information and Methods (TI&M) Committee serves to coordinate the information within all of BICSI's technical publications. BICSI officers, membership, and Technical Publications and Design staff wish to thank the TI&M Committee and its many volunteer contributors who helped in the development of the first version of *BICSI's Special ICT Design Considerations* publication.

The following dedicated TI&M Subject Matter Experts (SMEs) provided the key expertise required for the development of this publication's technical content:

TI&M Chair:

Robert M. Gross, RCDD, OSP; *GroTech*

TI&M Vice-Chair:

Robert B. Hertling, Jr., RCDD, OSP; *Parsons Transportation Group*

TI&M Secretary:

Robert Y. Faber Jr., RCDD, NTS; *Atras Network Communications*

BICSI

Version 1.0 Contributors:

Gordon J. Ash, RCDD; *Leidos Engineering*

Jerry L. Bowman, RCDD, NTS, RTPM; *ICS Nett, Inc.*

James “Ray” Craig, RCDD, NTS, BICSI Technician; *Craig Consulting Services*

George M. Fewell, RCDD; *NCI Inc.*

Robert M. Gross, RCDD, OSP; *GroTech*

Robert B. Hertling, Jr., RCDD, OSP; *Parsons Transportation Group*

Joop Ierschot, RCDD; *Deerns Consulting Engineers*

Philip W. Janeway, RCDD; *Level3 Communications*

David P. Labuskes, RCDD, NTS, OSP; *InfoComm International*

John Romanski, OSP, WD, ESS, RTPM, DCDC; *University of Central Florida, Computer Services*

Michael Sexton, RCDD, ESS; *Leidos Engineering*

Jeff Silveira, RITP, CAE, AStd; *BICSI Director of Standards*

Jacob Robert (Bob) Vis, MSc.; *Deerns Consulting Engineers*

Michael J. Wilson, RCDD; *Tellabs, Inc.*

BICSI Policy for Numeric Representation of Units of Measurement

BICSI technical manuals primarily follow the modern metric system, known as the International System of Units (SI). The SI is intended as a basis for worldwide standardization of measurement units. With the exception of conduit and plywood measurements, units of measurement in this publication are expressed in general and approximate SI terms, followed by an equivalent imperial (U.S. customary) unit of measurement in parentheses (exceptions are listed below):

- In general, approximate (soft) conversions are used in this publication and are denoted with the approximate symbol (\approx) in front of the metric number. Approximate conversions are considered reasonable and practicable; they are not precise equivalents, but are considered as “industry friendly.” Example: ≈ 15 m (50 ft), not the hard conversion of ≈ 15 m (49.2 ft).

In some instances, equivalents (hard conversions) may be used when it is a:

- Manufacturer requirement for a product (e.g., conduit, plywood sizes).
- Standard or code requirement.
- Safety factor.
- In general, approximate SI units of measurement are converted to an imperial unit of measurement and placed in parentheses. Exception: When the reference material from which the value is pulled is provided in imperial units only, the imperial unit is the benchmark.
- For metric conversion guidelines, refer to IEEE/ASTM SI 10, American National Standard for Metric Practice.
- Trade size is approximated for both metric and nonmetric purposes. Example: ≈ 100 metric designator (4 trade size).
- In some instances (e.g., optical fiber media specifications), the physical dimensions and operating wavelengths are designated.

Technical Publications

Become a member and you will receive substantial discounts on BICSI's highly acclaimed manuals—long considered the definitive reference source of the industry. BICSI's manuals serve as valuable reference and study tools for BICSI courses and exams. BICSI manuals are based on global best practices that follow and, in many cases, exceed the requirements of recognized international codes, standards, and regulations. Our most popular publications include the *Telecommunications Distribution Methods Manual (TDMM)*, *Electronic Safety and Security Design Reference Manual (ESSDRM)*, *Outside Plant Design Reference Manual (OSPDRM)*, and *Information Technology Systems Installation Methods Manual (ITSIMM)*. Standards include ANSI/BICSI 002-2011, *Data Center Design and Implementation Best Practices*, ANSI/BICSI 004-2012, *Information Technology Systems Design and Implementation Best Practices for Healthcare Institutions and Facilities*, and ANSI/BICSI 005-2013, *Electronic Safety and Security (ESS) System Design and Implementation Best Practices*.

Special ICT Design Considerations

This publication includes the latest information related to special information and communications technology (ICT) design considerations for applications such as industrial areas, secured cabling systems, systems that process financial data, and transportation facilities. Information on the Americans with Disabilities Act (ADA) requirements and the codes and standards for European building cabling systems also is included.

Table of Contents

Special ICT Design Considerations	1
Introduction	1
Public Telephones and Internet Installations	2
Overview	2
Telephone Types	2
Public Internet	2
Handicapped Access and the Americans with Disabilities Act (ADA)	3
Overview	3
Americans with Disabilities Act (ADA) Existing Facilities Rule	4
Readily Achievable Removal of Barriers.	4
Alterations	4
New Construction.	4
Public Telephones and Text Telephones	5
Americans with Disabilities Act (ADA) Height Requirements	6
Text Telephones	9
Volume Control.	9
Signs.	9
Poolside Telephone Service	10
Protection from the Environment	10
Limiting Access.	10
Safety Requirements	10
Compartments and Enclosures	11
Ring-Indicator Lamps	11
Multiple Cable Access	11
Corrosion-Resistant Pedestals.	11
Example of Poolside Telephone Service	12
Attendant, Reception, and Operation Center Areas	13
Overview	13
Environmental Considerations.	13
Special Requirements	14
Providing Maintenance Access Room	14
Meeting Cabling Needs	14
Entrance Facility, Equipment Room, and Telecommunications Room (TR) Requirements	14

- European Building Cabling Considerations15**
 - Overview 15
 - Existing Conditions 15
 - Regional Standards 16
 - Utility-Owned Cabling 16
 - Standard and Nonstandard Electrical Power (Mains) Components 16
 - Regulatory Conditions 17

- Utility Tunnels.18**
 - Overview 18
 - Motivating Factors. 18
 - Application Areas 18
 - Construction Methods 19
 - Advantages 19
 - Disadvantages 19
 - Utility Requirements 19
 - Hazards 20
 - Ventilation 20
 - Fire Protection 20
 - Electrical Protection. 21
 - Spacing between Bonding Points. 22
 - Shallow Tunnel Detail 23

- Secured Cabling Systems24**
 - Overview 24
 - Physical Separation 24
 - Electrical Separation 24
 - Facility Considerations 24
 - Physical Security Considerations 24
 - Signal Cables 25
 - Screened (Shielded) Metallic Cables 25
 - Screened (Shielded) Termination 25
 - Optical Fiber Cables 26
 - Multifiber Cables 26
 - Cable Strength Members or Shielding 26
 - Signal Distribution. 26
 - Pathways 27
 - Work Area Outlet 27
 - Patching Equipment. 27
 - Distribution Equipment (Wire Closets) 27
 - Protected Distribution Systems (PDS) 27

Industrial Premises28

 Overview 28

 Specific Conditions in Industrial Premises 29

 Climatic (Temperature and Humidity) Control 29

 Hazardous Locations 30

 Areas with Exposure to Chemically Reactive Materials 30

 Areas with Electromagnetic Interference (EMI)/
 Electromagnetic Compatibility (EMC) Concerns 30

 Cabling and Connector Arrangements for Industrial Premises. 31

Systems That Process Financial Information32

 Overview 32

Marinas32

 Overview 32

Transportation Facilities33

 Overview 33

 Multimodal Transportation Facility 34

 Office, Maintenance, and Operational Facilities 34

 Retail and Food and Beverage Outlets 35

 Public Facilities 35

 Core Facility Functions 35

 Codes and Standards. 36

 Unique Factors 36

 Terrorist Attacks and Public Disorder 36

 Vehicle Incidents and Adverse Weather. 37

 Hours of Operation 38

 Transportation Facility Communication Infrastructure Considerations. 39

 Telecommunications Room (TR) Planning 39

 Physical Locations and Architectural Issues. 39

 Telecommunications Rooms (TRs) 39

 Equipment Rooms (ERs) 40

 Secondary Equipment Rooms (ERs) 41

 Entrance Facility (EF) Room. 42

 Telecommunications Cabling. 42

 Structured Cabling Hierarchy. 42

 Telecommunications Requirements Outside of Facility Buildings
 (Outside Plant [OSP]). 42

 Cabling (Inside Plant). 42

 Cable Pathways and Raceways Requirements 42

 Typical Services and Systems Used in Transportation Facilities 43

 Audiovisual (AV) Distribution Systems 43

Special ICT Design Considerations

Check-in, Fare Collection, and Payment Systems 43
Baggage, Cargo, and Freight Handling and Vehicle Tracking Systems 44
Voice Communications Systems 44
Facility Management and Control Systems 44
Facility Traffic 44
Integration 45
